

Embedding an Image in Google Earth:

1. Find an image and keep left clicking on the image until you get the root image source > Right click on this base image > Select Properties
2. Highlight the image's full URL location and copy
3. Highlight all of the blue text in the code below and paste your Image URL in its place
4. Highlight the entire code, copy it and paste it into your Google Earth place mark properties description box.

```
<td align="center"> </td>
```
